

1 Create a Session for Your Student

Create a session in Assessdo for your student and set the timeline. Assessdo provides you with up to 26 college decks pertinent to schools your student is interested in attending.

2 Student Profile

Begin understanding the student by having them fill out their profile on the mobile app with their goals, extra curriculars, self-aware strengths and weaknesses.

- Goals
- Extracurricular Activities
- Strengths
- Areas for Growth
- Interests and Motivations

3 Connect With Your Student Beyond the Conversations

Use multiple tools to capture a complete picture of your student.

a

Check-in Videos

When your conversation ends, the connection does not. Put together check-in videos directly on your phone.

Students can watch the video and respond via text or voice.

b

Upload Quantitative Data

Upload grades, transcripts, attendance, test scores or other data. Assessdo translates numbers into emotional connections to targets and sources of the data. Assessdo then automatically validates with the student on their mobile app how they actually feel, giving more context behind their numbers.

c

Characteristic Check-ins

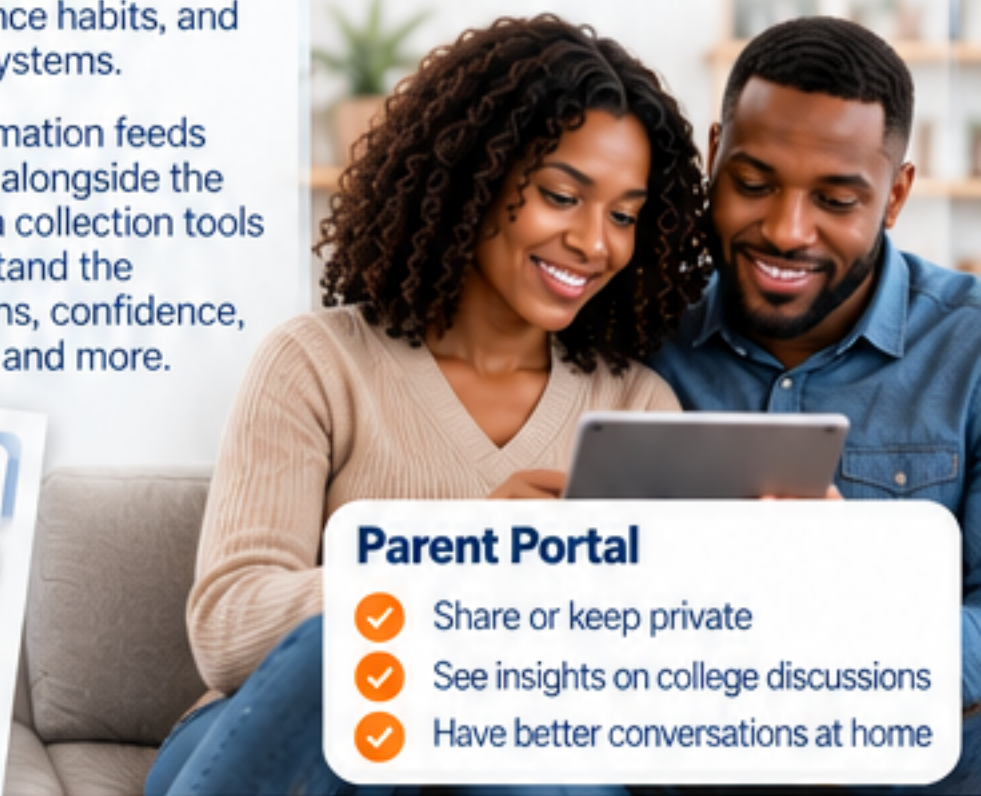

Ask questions focused on academic, social, emotional, lifestyle, family dynamic, mental toughness, performance habits, and support systems.

This information feeds Assessdo alongside the other data collection tools to understand the motivations, confidence, resilience and more.

d

Parent Observations

Parents can jot down observations on their mobile parent portal and make them public for the IEC to see, or private solely to view themselves.

Parent Portal

- Share or keep private
- See insights on college discussions
- Have better conversations at home

4 All Information Is Aggregated and Analyzed

Assessdo brings together student voice, advisor observations, parent insights and quantitative data to understand the mindset behind motivations, confidence, resilience, challenges, engagement and success.

Student Voice

ASSESSDO
AI Analysis &
Student Validation

- Motivations
- Confidence
- Resilience
- Challenges
- Engagement
- Support Systems
- Mindset
- And More...

5 Ask Any Question and Get Actionable Insight

Receive snapshots, detailed analysis and recommendations to move towards the next meeting. The Parent Portal also provides specific insights on college discussions, with guardrails designed by each IEC and organization.

Example Questions:

- What is driving this change?
- Where should I focus next?
- What are the key themes for this student?
- What support do they need?
- How do they feel about their college list?

STAY CONNECTED BETWEEN CONVERSATIONS.
